December 6, 2013

All Products manufactured by MCI Transformer Corporation are compliant with the RoHS directive.

Our products are built in accordance with the guidelines of the European Directive known as the RoHS2 Directive. Our compliancy is without exemptions.

European Directive 2011/65/EU, also known as the Restriction of (certain) Hazardous Substances or the RoHS2 Directive, was published in the Official Journal of the European Union in July, 2011. It was at this point that the RoHS Directive became law within Europe, which currently includes 25 member states. The RoHS2 Directive essentially states that electrical and electronic equipment placed on the market within the EU shall not contain the following:

Cadmium	No more than 0.01%
Lead	No more than 0.10%
Mercury	No more than 0.10%
Hexavalent chromium	No more than 0.10%
Polybrominated byphenyls (PBBs)	No more than 0.10%
Polybrominated diphenyl ethers (PBDEs)	No more than 0.10%

A handwritten signature in blue ink, appearing to read 'Timothy R. White'.
